

CLOUD SECURITY · AWS IAM

Assignment 20

IAM Practical — Step by Step

A Clean, Structured Study Guide

Prepared by: Shreya Panchal

Topic: IAM Users, Groups & Programmatic Access

Platform: Amazon Web Services (AWS)

Table of Contents

1	Task 1: Open IAM Dashboard	03
2	Task 2: Create IAM User InstaUploader	04
3	Task 3: Create Group ContentCreators	06
4	Task 4: IAM User vs IAM Role	07

Task 1 • Open IAM Dashboard

Steps

1. Login to AWS Console
2. Search **IAM**
3. Click IAM Dashboard
4. Left side → Users

Task 2 • Create IAM User InstaUploader

GOAL

Programmatic access only (Access Key).

Step 1

IAM → Users → Create user

Step 2: User Details

Field	Value
User name	InstaUploader
AWS Management Console access	Don't enable

Click Next

The screenshot shows the AWS IAM console interface for creating a new user. The breadcrumb trail is IAM > IAM users > Create user. On the left, a sidebar shows the steps: Step 1: Specify user details (selected), Step 2: Set permissions, and Step 3: Review and create. The main area is titled 'Specify user details' and contains a 'User details' section. The 'User name' field is filled with 'InstaUploader'. Below it, a note states: 'The user name can have up to 64 characters. Valid characters: A-Z, a-z, 0-9, and + = , . @ _ - (hyphen)'. There is an unchecked checkbox for 'Provide user access to the AWS Management Console - optional', with a note that users with 'SigninLocalDevelopmentAccess' permissions can use console credentials for programmatic access. A blue callout box contains a tip: 'If you are creating programmatic access through access keys or service-specific credentials for AWS CodeCommit or Amazon Keyspaces, you can generate them after you create this IAM user. Learn more'. At the bottom right are 'Cancel' and 'Next' buttons.

Screenshot: IAM → Create user → Specify user details

Step 3: Permissions

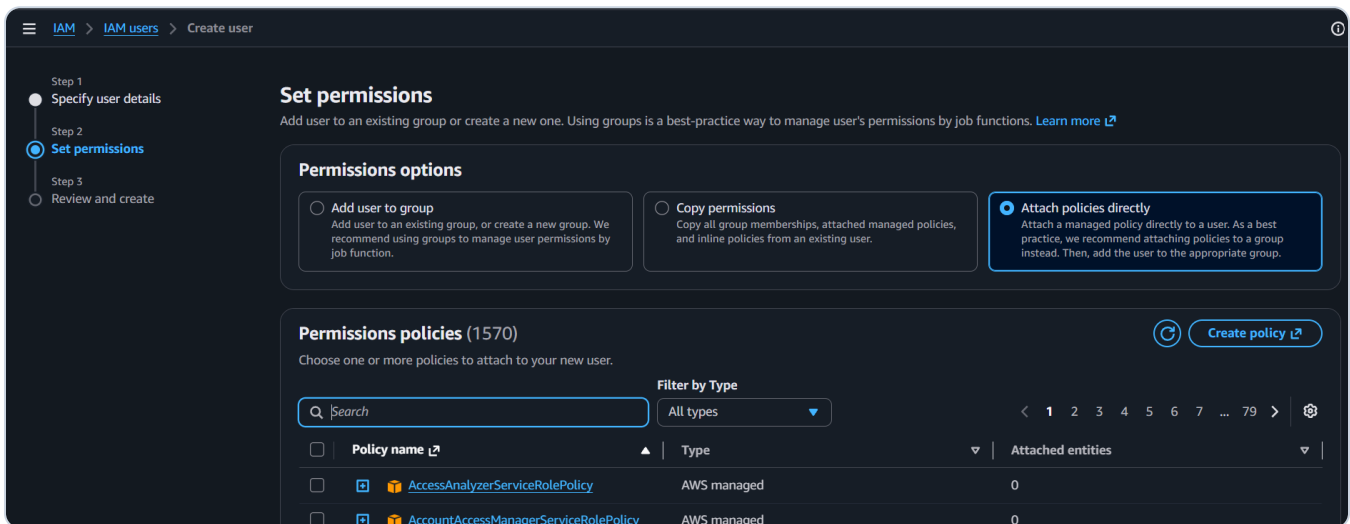

Select:

- Attach policies directly
- Don't attach any policy

Click Next → Create user

IMPORTANT

Is task me koi permission attach nahi karni.

Screenshot: IAM → Create user → Set permissions

Step 4: Create Access Key

Open InstaUploader

- Go to Security credentials
- Scroll to Access keys
- Click Create access key

Choose:

Command Line Interface (CLI)

Tick confirmation → Next

Description:

InstaUploader CLI Key

Click Create access key

WARNING

AWS sirf ek baar Secret Key dikhata hai.

Click: **Download .csv**

Task 3 · Create Group ContentCreators

Step 1

IAM → User Groups

Click Create group

Step 2

Field	Value
Group name	ContentCreators

Step 3

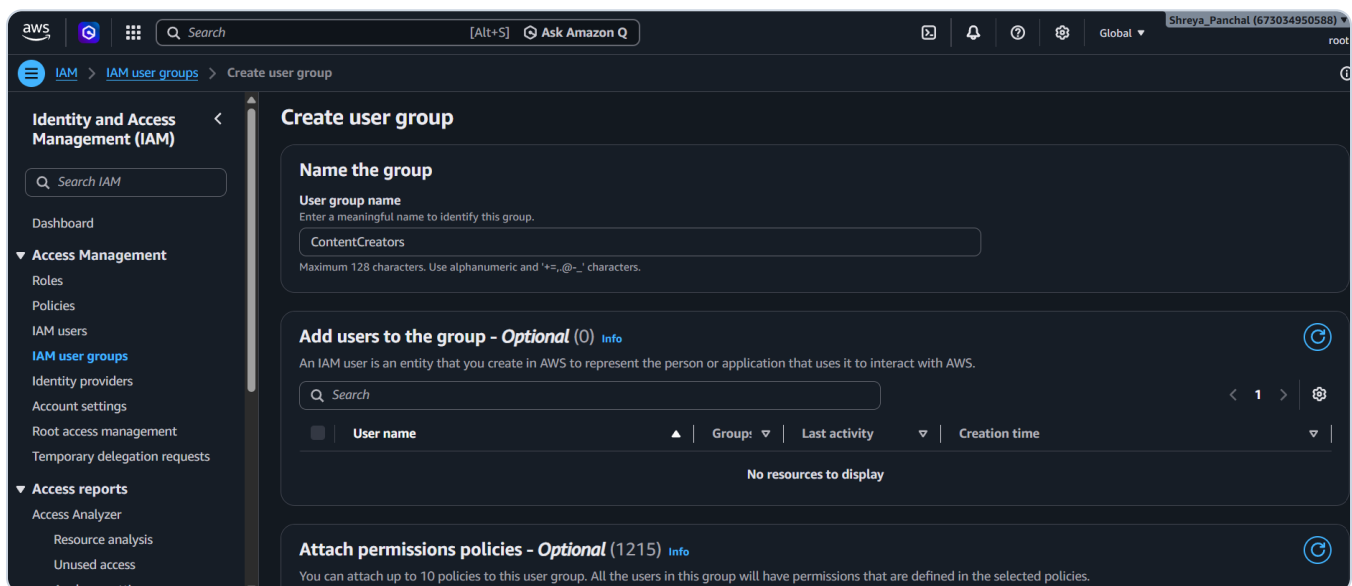

Members section me select:

InstaUploader

Permissions:

- No policies

Click Create group

Screenshot: IAM → User groups → Create user group

Task 4 • IAM User vs IAM Role (3–4 Lines)

Answer

IAM USER

An IAM User is created for a specific person and has permanent credentials like a password or access key.

IAM ROLE

An IAM Role provides temporary permissions and is assumed by AWS services or users when needed.

Example: A **Zomato** delivery agent uses an IAM User to access the delivery app, while an **EC2** server uses an IAM Role to access S3 without storing permanent credentials.
